

Europe Goes Local in Sweden - Youth work quality development through documentation and follow up

Sweden, Gothenburg, October 19 - October 21, 2021

Study visits: KEKS and The Logbook – quality development through documentation and follow up.

This study visit contains a presentation of the KEKS web-based system for documentation and follows up of youth work, The Logbook, and how it is used for developing youth work, both in theory and through visits to youth centres that are working with the system.

This study visit aims to show the participants how continuous documentation and follow up through The Logbook functions as a basis for cooperation and the further development of youth work as well as the consequences this has had for quality and recognition.

The programme will be a mix of presentations, discussions, workshops and study visits to youth houses and centres using the system.
